DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12 April 2004 has been entered.

Election/Restriction

- 2. Claims 1-5 are directed to an allowable product. Pursuant to the procedures set forth in the Official Gazette notice dated March 26, 1996 (1184 O.G. 86), claims 6-9, directed to the process of making or using the patentable product, previously withdrawn from consideration as a result of a restriction requirement, are now subject to being rejoined. Claims 6-9 are hereby rejoined and fully examined for patentability under 37 CFR 1.104.
- 3. Since all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement made in Paper No. 6 is hereby withdrawn.

Allowable Subject Matter

4. Claims 1-9 are allowed.

Application/Control Number: 09/902,972

Art Unit: 2879

5. The following is an examiner's statement of reasons for allowance: Applicant has amended independent claim 1 to cite the cathode ray tube having a colored layer containing a coloring agent having a specific density distribution. Applicant also notes the criticality of this specific density distribution, as also cited in applicant's written description.

- 6. Thus, the prior art of record neither shows or suggests a cathode ray tube comprising, in addition to other limitations of the claim, a colored layer containing a coloring agent having a density distribution such that a ratio of an emission luminance in a part that exhibits the lowest emission luminance in a part that exhibits the highest emission luminance is not less than 75% and a ratio of a diffuse reflectance in a part that exhibits the lowest diffuse reflectance to a diffuse reflectance in a part that exhibits the highest diffuse reflectance is not less than 90%.
- 7. The subject coloring agent having the above described density distribution is provided for obtaining emission luminance and distribution of contrast naturally over the entire face portion of the panel. Due to their dependency upon independent claim 1, claims 2-9 are also allowable. The design is new and unique to the art.
- 8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Quarterman whose telephone number is (571) 272-2461. The examiner can normally be reached on M-TH (7-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nimesh Patel can be reached on (571) 272-2457. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
